

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Java Full Stack Developer

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Domain: Java Full Stack Development

Ankit Kumar

Roll No. 2410031066 | B.Tech CSE

April – June 2026

**Ankit
Kumar**

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410031066

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE, Batch 2024–2028

Internship Domain

Java Full Stack Developer

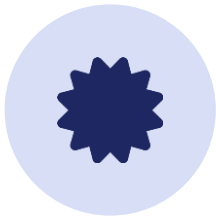

Duration

8 Weeks | April – June 2026

ABOUT THE PROGRAM

EduSkills, AICTE & Industry-Aligned Learning

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme "Nation Building Through Skills." It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the Java Full Stack Developer track, EduSkills has designed an industry-aligned curriculum that helps engineering students build practical, job-ready skills in end-to-end web application development.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018 certified organization.

AICTE Patronage

Run under the AICTE National Internship Portal.

Industry-Ready Curriculum

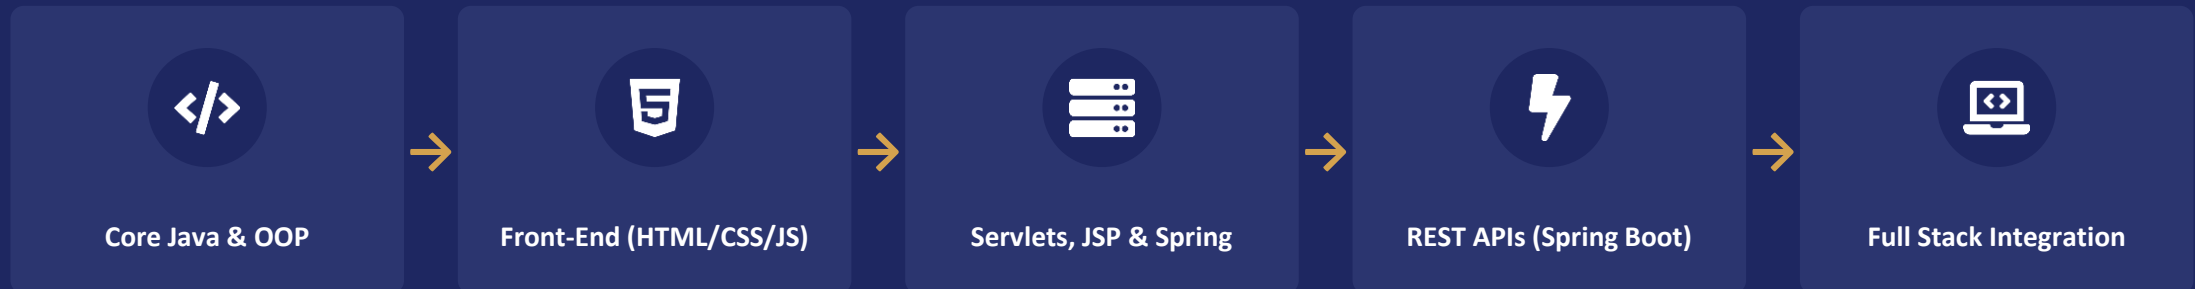

Job-ready skills for end-to-end full stack development.

PROBLEM STATEMENT

Bridging Theory and Full Stack Practice

Although many engineering students learn the theoretical foundations of programming and object-oriented concepts in coursework, very few get structured, hands-on exposure to building a complete web application that integrates front-end, back-end, and database layers using an industry-standard stack such as Java, Spring Boot, and MySQL. Concepts like RESTful API design, server-side programming, and database connectivity are often understood only theoretically.

This internship addressed that gap — practically learning the full Java Full Stack workflow:

What the Internship Set Out to Achieve

Core Java & OOP

Strengthen core Java programming and object-oriented concepts.

Front-End Development

Learn HTML5, CSS3 and JavaScript for web interfaces.

Servlets, JSP & MVC

Understand server-side programming and the MVC design pattern.

Spring Framework

Learn Dependency Injection and Inversion of Control.

RESTful Web Services

Build and test REST APIs using Spring Boot.

Database Design (JDBC)

Design relational schemas and integrate via JDBC/MySQL.

Full Stack Integration

Combine front-end, back-end and database into one app.

Final Assessment

Clear the Final Assessment / Internship Grade Point Assessment.

The Toolkit Behind the Internship

Java

Core language & OOP

HTML5 / CSS3

Front-end structure & styling

JavaScript

Client-side interactivity

Servlets & JSP

Server-side programming (MVC)

Spring

DI & Inversion of Control

Spring Boot

RESTful web services

MySQL & JDBC

Relational data & connectivity

Eclipse / Postman / Git

Dev, testing & version control

From Core Java to a Deployed Web App

Presentation Layer

User interface built using HTML5, CSS3 and JavaScript.

Application / Business Layer

Server-side logic via Servlets, JSP and the Spring Framework.

API Layer

RESTful web services built using Spring Boot.

Data Access Layer

CRUD operations via JDBC against MySQL.

Database Layer

MySQL relational database storing application data.

Assessment Layer

Weekly quizzes, assignments & Final Grade Point Assessment.

The 8-Week Learning Journey

1 WEEK

Core Java & OOP

Classes, objects, inheritance, polymorphism, exception handling.

2 WEEK

Front-End Web Basics

Page structure & styling using HTML5, CSS3, JavaScript.

3 WEEK

Advanced Java & JDBC

Collections, multithreading basics, DB connectivity via JDBC.

4 WEEK

Servlets & JSP

Dynamic server-side pages and the MVC design pattern.

5 WEEK

Spring Framework

Dependency Injection and Inversion of Control.

6 WEEK

Spring Boot & REST APIs

Developing and testing RESTful web services.

7 WEEK

Database Design

MySQL schemas and CRUD operations for the app.

8 WEEK

Full Stack Integration

Integrating front-end, back-end & database layers.

EXPECTED OUTCOMES

Skills & Capabilities Gained

- ✓ Ability to apply core Java and object-oriented programming concepts to real development tasks.
- ✓ Practical understanding of front-end web development using HTML, CSS and JavaScript.
- ✓ Hands-on exposure to server-side programming using Servlets, JSP and the Spring Framework.
- ✓ Capability to design and develop RESTful APIs using Spring Boot.
- ✓ Skill to design MySQL database schemas and connect them to a Java application using JDBC.
- ✓ Ability to integrate front-end, back-end and database layers into a complete full stack web application.
- ✓ Successful completion of the Final Assessment / Internship Grade Point Assessment with an "Excellent" grade.

CERTIFICATION

Successfully Completed

Grade

E – Excellent

Certificate ID

4811b5db1e31b0e84d89

Student ID

STU69984794de59b1771587476

Duration

8 Weeks | April – June 2026
